

## Come Down off the Cliff – by Jan Shank

First of all, I'm sure you are all thinking that the audit proved that we "lost!" Nothing could be further from the truth!

I'm putting together a breakdown of the information that was presented to the Senate yesterday and will get it to you by the end of the day today....rather than being depressed, among all of the five hundred+ that were there yesterday, there was a celebration.

Doug Logan, Cyber Ninja's president, has said all along the goal wasn't to get Donald Trump back in the White House, but to uncover the problems that seemed to be apparent in Arizona's election. The problems identified yesterday are MANY, they are clearly criminal, and prosecutable. Having said that, I will break down for you the statutes in Arizona's Election Laws, the proof that they were violated, and the impact those had on the outcome of the 2020 election.

I would remind those of you that watched the event yesterday of former Secretary of State Bennett's testimony at the end of the presentation....as well as Doug Logan's recommendations on what should be done to fix our election system. These lists of Statute's that were affected were what the audit was looking for from the beginning.

As you all know, the only person who can prosecute those that should be held accountable is our Attorney General, Mark Brnovich. The entire report has been given to him... now we wait to see what he does with that report! (I, for one, certainly hope he doesn't take as long as Durham has..lol)

Look for the breakdown in the next day or so, meanwhile remember that the mainstream media is only reporting the fact about the numbers, not the facts behind those numbers....the counting of the votes was always going to be the same...(the numbers from Maricopa County and the Audit)...the difference is what was uncovered between the LEGAL VOTES and the RAW VOTES cast.

Look for my follow up email..  
Until then, come down off of the Cliff.
